AxisWire, ComboExploitGreat, ByteCrack, Destx, Haxe, Maximal Tries, nscapi, nscapi32, PwBot, RemoteDesktopPasswordCrack, RxImpactor, Vapourware A: Language is programming, and I assume you want to know what the programming language is in the binaries. To do this you can use the strings function. Overview The strings function displays information about a specific executable. The strings command lists all strings in an executable. The output includes the name, value, and size of the strings, as well as the data pointer to the location of the string. You can run strings on a command line. You can also input the file name of Microsoft Windows PE executables. Syntax string [-a] [-o] [-s] [-a] [-d] [-f] [filename...] examples: strings "notepad.exe" strings notepad.exe strings -d "C:\temp" "notepad.exe" strings -f "notepad.exe" "J:" strings -d "Windows\Winlogon.exe" "notepad.exe" strings notepad.exe | find "MSIL\Win32\comdlg32.dll" strings notepad.exe | find "MSIL\Win32\mf90.dll" strings notepad.exe | find "MSIL\Win32\manip\comdlg32.dll" strings -o "progs\update\update.exe" For more information, use the -h parameter. A: Before dealing with suspicious files, get a bigger hammer. Download Windows HijackThis and proceed to go through all its options and click on "Show All Tools". You should be able to identify any vulnerabilities and malware which is causing these abnormalities. The 2 suspicious tools which seems to be sending the file to the attacker are: IDM - Internet Download Manager C:\temp\chmDB\notepad\img\chm-img.cab order to maintain this prison environment, it is necessary that the prisoner turn in his clothes. He is given the choice of whether or not to wear the prison dress. If he doesn't choose f678ea9f9e
